Patiala, Punjab, India

Professional Summary

Computer Science Engineering student with strong foundations in **software engineering, full-stack development, and backend systems**. Experienced in building **scalable web applications, REST APIs, and database-driven platforms** using modern technologies. Skilled in **problem-solving, debugging, structured data handling, and system design fundamentals**. Comfortable working in fast-paced environments with strong attention to detail, adaptability, and collaborative problem-solving. Passionate about building reliable software solutions and continuously learning new technologies.

Technical Skills

Languages: Java, JavaScript, SQL

Frontend: React.js, Next.js

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, PostgreSQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Systems & Data: API Design, Structured Data Handling, Debugging

Tools: Git (Version Control), GitHub, Postman

Projects

MediCore – Hospital Management System

[Live Link](#)

MongoDB, Express.js, React.js, Node.js

- Built a full-stack hospital management platform with dedicated dashboards for Admins, Doctors, Patients, and Receptionists.
- Developed REST APIs for appointment booking, billing, medical records, and role-based workflow management.
- Implemented JWT-based authentication and secure role-based access control for protected healthcare operations.
- Integrated Cloudinary for secure storage and management of prescriptions, reports, and medical documents.

BachatSaathi – Personal Finance System

[Live Link](#)

MongoDB, Express.js, React.js, Node.js

- Built a finance management platform with JWT authentication and secure role-based access control.
- Developed APIs for transaction tracking, financial data handling, and expense management workflows.
- Improved backend performance through query optimization and modular application architecture.
- Designed responsive user interfaces for smooth financial tracking and improved user experience.

MartNexus – Inventory Management System

[Live Link](#)

React.js, Node.js, Supabase, Prisma

- Developed an inventory management system for tracking products, stock levels, and order operations.
- Implemented backend workflows using Prisma and Supabase for efficient database and API management.
- Built responsive frontend interfaces with seamless API integration and real-time inventory updates.
- Improved inventory monitoring workflows through structured product and order management features.

Core Competencies

- | | |
|---|-------------------------------------|
| • Problem Solving & Analytical Thinking | • Attention to Detail |
| • Database Design & Management | • Backend & API Development |
| • Logical Reasoning & Debugging | • Team Collaboration & Adaptability |

Education

Chitkara University, Himachal Pradesh

Bachelor of Engineering in Computer Science

CGPA: 8.89

Aug 2023 – Present

Achievements & Certifications

- **Google Cloud Study Jam Certificate** – Cloud fundamentals and scalable systems.
- **Naukri Campus Young Turks** – Recognized for analytical aptitude and problem-solving.
